### **DETAILED ACTION**

**Claims 11, 16, 31, and 44 are canceled.**

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-10, 12, 14, 15, 17-32, 34-43, and 45 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear from the specification which so called "first circuit", "second circuit", and "third circuit" as claimed.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10, 12, 14, 15, 17-32, 34-43, 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Yang (6,710,657).

Regarding claims 1, 2, 14, 17-22, 34, 35, Yang (Figs. 3, 4) discloses a gain control circuit comprising: a transconductance circuit (320/T1) can be read as a gain stage; elements connect to the collector of transistor (T1) can be read as a programmable resistance, wherein the programmable resistance including a plurality of switches (T3, T5) in parallel with a resistive element ( $Z_o$ ), and an output node at  $V_{out}$  and the switches (T3, T5) are capable of changing the gain at the output.

Regarding claims 3-5, 10, 15, 23-25, 30, 36-38, 43, wherein the switch operation and the gain characteristics recited is inherently seen in the operations of the reference circuit since all the essential elements of the claimed invention are disclosed in Yang.

Regarding claims 6-8, 26-28, 39-41 wherein transistors (T3, T5) are inherently seen having a resistance values.

Regarding claims 9, 29, 42, wherein Yang's circuit (Fig. 3) is differential and having two branches.

Regarding claims 12, 32, 45, wherein a control circuit (not shown) is connected to the control terminals of transistors (T3, T5) and the control circuit can be read as a third circuit.

***Allowable Subject Matter***

Claims 13, 33, 46 allowed.

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Jeong et al. (6,424,222)) shows variable gain amplifier having variable resistance.
